

The diagram illustrates a system architecture with four vertical boards connected to a common horizontal backplane board at the bottom. The first board on the left is a 'Main board' with a blue border and light blue fill, labeled 'shared coordination'. It is connected to the backplane by two vertical lines. The second board is a 'Function board' with a grey border and light grey fill, labeled 'video', also connected by two vertical lines. The third board is another 'Function board' with a grey border and light grey fill, labeled 'clocks and bias', connected by two vertical lines. The fourth board on the right is a dashed 'Additional function board' with a grey border and light grey fill, labeled 'as needed', connected by two dashed vertical lines. The backplane board at the bottom is a long horizontal rectangle with a blue border and white fill, labeled 'Backplane board' and 'common power, safety, timing, and interconnection'.
